

# Non-Freeze Water Points

The Wade non-freeze water point provides an external water source for plant watering, area cleaning, vehicle wash down and similar activities.

The product is designed to be installed with the valve seal located inside a building, whilst the on / off control mechanism and hose connections are outside; when the valve is turned off, water drains out from the unit so that freezing cannot occur.

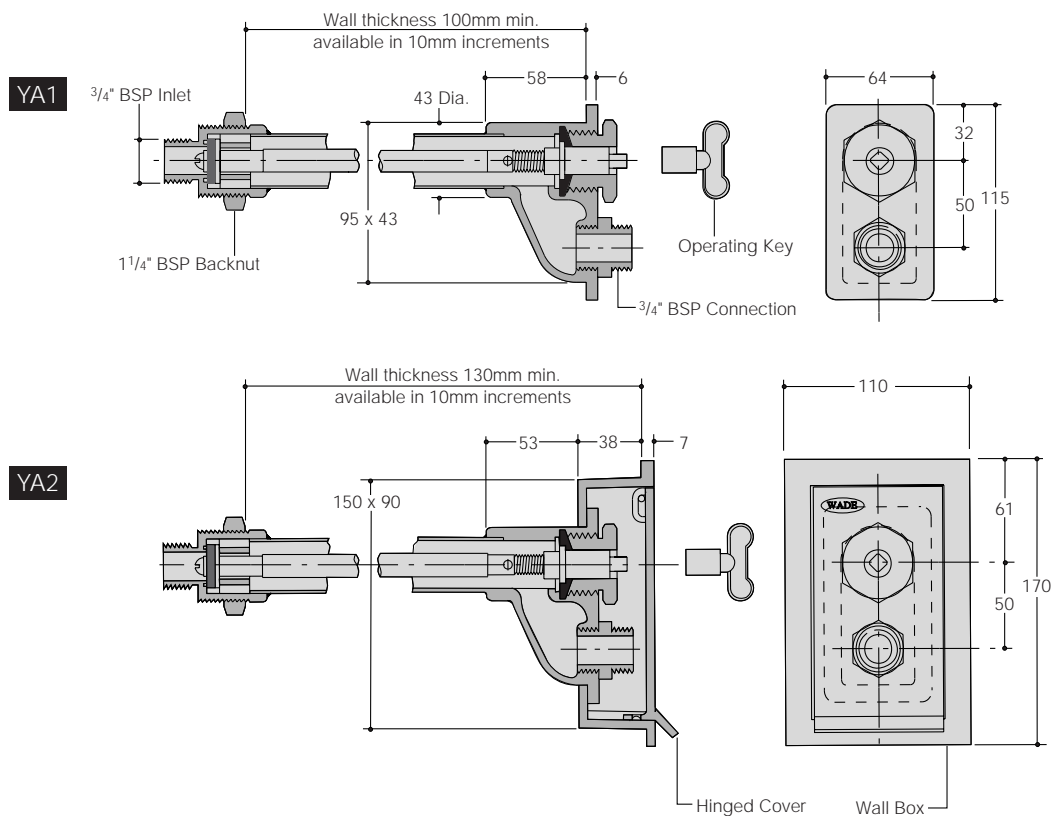

Made to suit a given wall thickness the product can be supplied with a wall box with optional locking cover to deter unauthorised access.

The Wade non-freeze water point is a U.K. Water Byelaws Scheme Approved Product - Certificate No. 0306007

**Cautionary note:**

Water points are non-freeze only when installed in the horizontal position, and are suitable for use only at normal mains supply pressure (up to 10 Bar maximum).

Spec. Code	Wall Box Material / Finish
YA101+ wall thickness mm	Without wall box
YA201 " "	Aluminium - White epoxy coated
YA202 " "	Nickel bronze - Satin
YA203 " "	Gunmetal - Satin
